General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) Michael Genesereth, Michael Thielscher

General game players are computer systems able to play strategy games based solely on formal game descriptions supplied at "runtime" (n other words, they don't know the rules until the game starts). Unlike specialized game players, such as Deep Blue, general game players cannot rely on algorithms designed in advance for specific games; they must discover such algorithms themselves. General game playing expertise depends on intelligence on the part of the game player and not just intelligence of the programmer of the game player.

GGP is an interesting application in its own right. It is intellectually engaging and more than a little fun. But it is much more than that. It provides a theoretical framework for modeling discrete dynamic systems and defining rationality in a way that takes into account problem representation and complexities like incompleteness of information and resource bounds. It has practical applications in areas where these features are important, e.g., in business and law. More fundamentally, it raises questions about the nature of intelligence and serves as a laboratory in which to evaluate competing approaches to artificial intelligence.

This book is an elementary introduction to General Game Playing (GGP). (1) It presents the theory of General Game Playing and leading GGP technologies. (2) It shows how to create GGP programs capable of competing against other programs and humans. (3) It offers a glimpse of some of the real-world applications of General Game Playing.

From reader reviews:

Robert Gibson:

Book is to be different for each grade. Book for children until adult are different content. As we know that book is very important normally. The book General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) seemed to be making you to know about other knowledge and of course you can take more information. It is very advantages for you. The reserve General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) is not only giving you much more new information but also being your friend when you really feel bored. You can spend your current spend time to read your publication. Try to make relationship with all the book General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning). You never experience lose out for everything in the event you read some books.

Mary Richards:

The book General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) will bring you to definitely the new experience of reading a book. The author style to elucidate the idea is very unique. When you try to find new book to learn, this book very ideal to you. The book General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) is much recommended to you to study. You can also get the e-book in the official web site, so you can quicker to read the book.

Jose Tiernan:

The reason why? Because this General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) is an unordinary book that the inside of the guide waiting for you to snap it but latter it will distress you with the secret that inside. Reading this book close to it was fantastic author who also write the book in such awesome way makes the content within easier to understand, entertaining technique but still convey the meaning fully. If I were being you I will go to the book store hurriedly.

Adriana Cornell:

Reading can called head hangout, why? Because when you are reading a book especially book entitled General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) your head will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging every single word written in a reserve then become one contact form conclusion and explanation this maybe you never get ahead of. The General Game Playing (Synthesis Lectures on Artificial Intelligence and Machine Learning) giving you an additional experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us

demonstrate the relaxing pattern is your body and mind is going to be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?
