Fishes and the Break-up of Pangea - Special Publication no 295 Geological Society Publishing House

This volume, in honour of Peter L. Forey, is about fishes as palaeobiogeographic indicators in the Mesozoic and Cenozoic. The last 250 million years in the history of Earth have witnessed the break-up of Pangaea, affecting the biogeography of organisms. Fishes occupy almost all freshwater and marine environments, making them a good tool to assess palaeogeographic models.

The volume begins with studies of Triassic chondrichthyans and lungfishes, with reflections on Triassic palaeogeography. Phylogeny and distribution of Late Jurassic neoselachians and basal teleosts are broached, and are followed by five papers about the Cretaceous, dealing with SE Asian sharks, South American ray-finned fishes and coelacanths, European characiforms, and global fish palaeogeography. Then six papers cover Tertiary subjects, such as bony tongues, eels, cypriniforms and coelacanths.

There is generally a good fit between fish phylogenies and the evolution of the palaeogeographical pattern, although a few discrepancies question details of current palaeogeographic models and/or some aspects of fish phylogeny.

Also available:

Non-Marine Permian Biostratigraphy and Biochronology - ISBN 1862392064

CRETACEOUS-TERTIARY HIGH-LATITUDE PALAEOENVIRONMENTS - ISBN 1862391971

The Application of Ichnology to Palaeoenvironmental And Stratigraphic Analysis - ISBN 1862391548

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Martha Williams:

Do you considered one of people who can't read pleasant if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Fishes and the Break-up of Pangea - Special Publication no 295 book is readable by simply you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to supply to you. The writer associated with Fishes and the Break-up of Pangea - Special Publication no 295 content conveys the idea easily to understand by a lot of people. The printed and e-book are not different in the information but it just different available as it. So , do you nevertheless thinking Fishes and the Break-up of Pangea - Special Publication no 295 is not loveable to be your top record reading book?

Joan Green:

Is it an individual who having spare time subsequently spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Fishes and the Break-up of Pangea - Special Publication no 295 can be the respond to, oh how comes? A fresh book you know. You are therefore out of date, spending your time by reading in this new era is common not a geek activity. So what these ebooks have than the others?

Josephine Widman:

In this era which is the greater individual or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is actually Fishes and the Break-up of Pangea - Special Publication no 295. This book and that is qualified as The Hungry Slopes can get you closer in becoming precious person. By looking up and review this book you can get many advantages.

Nancy Soto:

Some individuals said that they feel fed up when they reading a reserve. They are directly felt the idea when they get a half portions of the book. You can choose the book Fishes and the Break-up of Pangea - Special Publication no 295 to make your personal reading is interesting. Your current skill of reading ability is developing when you similar to reading. Try to choose basic book to make you enjoy you just read it and mingle the sensation about book and looking at especially. It is to be very first opinion for you to like to wide open a book and study it. Beside that the e-book Fishes and the Break-up of Pangea - Special Publication no 295 can to be your brand-new friend when you're feel alone and confuse using what must you're doing of the time.
