Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering)

A geopolymer is a solid aluminosilicate material usually formed by alkali hydroxide or alkali silicate activation of a solid precursor such as coal fly ash, calcined clay and/or metallurgical slag. Today the primary application of geopolymer technology is in the development of reduced-CO₂ construction materials as an alternative to Portland-based cements. Geopolymers: structure, processing, properties and industrial applications reviews the latest research on and applications of these highly important materials.

Part one discusses the synthesis and characterisation of geopolymers with chapters on topics such as fly ash chemistry and inorganic polymer cements, geopolymer precursor design, nanostructure/microstructure of metakaolin and fly ash geopolymers, and geopolymer synthesis kinetics. Part two reviews the manufacture and properties of geopolymers including accelerated ageing of geopolymers, chemical durability, engineering properties of geopolymer concrete, producing fire and heat-resistant geopolymers, utilisation of mining wastes and thermal properties of geopolymers. Part three covers applications of geopolymers with coverage of topics such as commercialisation of geopolymers for construction, as well as applications in waste management.

With its distinguished editors and international team of contributors, Geopolymers: structure, processing, properties and industrial applications is a standard reference for scientists and engineers in industry and the academic sector, including practitioners in the cement and concrete industry as well as those involved in waste reduction and disposal.

- Discusses the synthesis and characterisation of geopolymers with chapters covering fly ash chemistry and inorganic polymer cements
- Assesses the application and commercialisation of geopolymers with particular focus on applications in waste management
- Reviews the latest research on and applications of these highly important materials

From reader reviews:

Christine Pena:

Now a day people who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each data they get. How individuals to be smart in acquiring any information nowadays? Of course the answer is reading a book. Examining a book can help people out of this uncertainty Information mainly this Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering) book since this book offers you rich data and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it everbody knows.

Albert Chesson:

The e-book with title Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering) has a lot of information that you can study it. You can get a lot of advantage after read this book. That book exist new understanding the information that exist in this guide represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This specific book will bring you in new era of the the positive effect. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Donna Johnson:

Don't be worry should you be afraid that this book will filled the space in your house, you could have it in e-book means, more simple and reachable. This Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering) can give you a lot of good friends because by you considering this one book you have factor that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that possibly your friend doesn't recognize, by knowing more than different make you to be great persons. So , why hesitate? We need to have Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering).

Jerri Jackson:

Book is one of source of expertise. We can add our knowledge from it. Not only for students and also native or citizen want book to know the revise information of year to year. As we know those publications have many advantages. Beside we add our knowledge, can bring us to around the world. Through the book Geopolymers: Structures, Processing, Properties and Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering) we can consider more advantage. Don't that you be creative people? Being creative person must love to read a book. Only choose the best book that suitable with your aim. Don't possibly be doubt to change your life at this book Geopolymers: Structures, Processing, Properties and

Industrial Applications (Woodhead Publishing Series in Civil and Structural Engineering). You can more attractive than now.
