Returning readers will find that the content has also been restructured, improving access to related topics. Part One discusses the basic principles of infection control, including administrative issues, surveillance and reporting, sterilization, disinfection and decontamination, with an emphasis on the key area of hand hygiene. Part Two covers the specific areas of prophylaxis and treatment of infections. In Part Three prevention in different healthcare settings is presented, including issues particular to special wards and departments such as paediatric and neonatal units, intensive care, the elderly and those being treated or working within allied health areas such as x-ray, physiotherapy and the laboratory setting.
