IV Starts for the RN and EMT: RAPID and EASY Guide to Mastering Intravenous Catheterization, Cannulation and Venipuncture Sticks for Nurses and Paramedics ... the Fundamentals to Advanced Care Skills TEAM Rapid Response

Intravascular cannulation is one of the most difficult skills that most RNs, LVNs and EMTs will learn. If you are scared out of your mind about starting IVs, you are not alone. It is an invasive and often painful procedure that requires both skill and practice to master.

BLOWING VEINS?

ROLLING VEINS?

FLAT VEINS?

Or not even being able to find the vein?

Our goal is to provide you a RAPID and EASY way to dominate the IV stick! This is not an exhausting comprehensive textbook on IV therapy; instead we present a clear, concise and straightforward approach to starting I.V.s.

We will begin by introducing you to DIFFERENT IV DEVICES, their parts and functions, then move on to GAUGES and why it is important to choose the correct gauge for the job. The next section begins with a brief ANATOMY and physiology of veins and more importantly HOW TO MAKE THEM DISTEND AND POP OUT! You will also learn SITES TO AVOID and how to identify false friends—that is, veins that look good but will invariably blow.

Next we get to the heart of the book: a colorful, ILLUSTRATED STEP-BY-STEP GUIDE to starting a standard IV. Next we teach you the FLOATING TECHNIQUE and situations that call for it.

You will learn what actually CAUSES VEINS TO BLOW—and with the graphics—be able to see what the IV catheter is doing inside the vein to make it blow. The next chapter teaches you an easy method to FIND AND AVOID VALVES. Finally we end the book with an assortment of TIPS AND TRICKS of the trade to give you the best possible chance to succeed.

By the end you will have not just the skills to start an IV but the confidence to go out there and give each patient your two best shots.
