Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library) Ludomir M. Laudanski

„Between Certainty & Uncertainty” is a one-of-a-kind short course on statistics for students, engineers and researchers. It is a fascinating introduction to statistics and probability with notes on historical origins and 80 illustrative numerical examples organized in the five units:

- Chapter 1 *Descriptive Statistics*: Compressing small samples, basic averages - mean and variance, their main properties including God’s proof; linear transformations and *z-scored* statistics .

- Chapter 2 *Grouped data*: Udny Yule’s concept of qualitative and quantitative variables. Grouping these two kinds of data. Graphical tools. Combinatorial rules and qualitative variables. Designing frequency histogram. Direct and coded evaluation of quantitative data. Significance of percentiles.

- Chapter 3 *Regression and correlation*: Geometrical distance and equivalent distances in two orthogonal directions as a prerequisite to the concept of two regression lines. Misleading in interpreting two regression lines. Derivation of the two regression lines. Was Hubble right? Houbolt’s cloud. What in fact measures the correlation coefficient?

- Chapter 4 *Binomial distribution*: Middle ages origins of the binomials; figurate numbers and combinatorial rules. Pascal’s Arithmetical Triangle. Bernoulli’s or Poisson Trials? John Arbuthnot curing binomials. How Newton taught S. Pepys probability. Jacob Bernoulli’s Weak Law of Large Numbers and others.

- Chapter 5 *Normal distribution and binomial heritage* – Tables of the normal distribution. Abraham de Moivre and the second theorem of de Moivre-Laplace.

- Chapter 1 *Descriptive Statistics*: Compressing small samples, basic averages - mean and variance, their main properties including God's proof; linear transformations and *z-scored* statistics .

- Chapter 2 *Grouped data*: Udney Yule's concept of qualitative and quantitative variables. Grouping these two kinds of data. Graphical tools. Combinatorial rules and qualitative variables. Designing frequency histogram. Direct and coded evaluation of quantitative data. Significance of percentiles.

- Chapter 3 *Regression and correlation*: Geometrical distance and equivalent distances in two orthogonal directions as a prerequisite to the concept of two regression lines. Misleading in interpreting two regression lines. Derivation of the two regression lines. Was Hubble right? Hubble's cloud. What in fact measures the correlation coefficient?

- Chapter 4 *Binomial distribution*: Middle ages origins of the binomials; figurate numbers and combinatorial rules. Pascal's Arithmetical Triangle. Bernoulli's or Poisson Trials? John Arbuthnot curing binomials. How Newton taught S. Pepys probability. Jacob Bernoulli's Weak Law of Large Numbers and others.

- Chapter 5 *Normal distribution and binomial heritage* – Tables of the normal distribution. Abraham de Moivre and the second theorem of de Moivre-Laplace.

- Chapter 5 *Normal distribution and binomial heritage* – Tables of the normal distribution. Abraham de Moivre and the second theorem of de Moivre-Laplace.

From reader reviews:

Silvia McElroy:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a guide. Beside you can solve your trouble; you can add your knowledge by the guide entitled Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library). Try to stumble through book Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library) as your buddy. It means that it can to become your friend when you really feel alone and beside associated with course make you smarter than before. Yeah, it is very fortunated for you. The book makes you more confidence because you can know every thing by the book. So , we should make new experience and knowledge with this book.

Chad Foster:

Reading a publication can be one of a lot of task that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a guide will give you a lot of new info. When you read a book you will get new information simply because book is one of many ways to share the information or their idea. Second, reading a book will make you actually more imaginative. When you reading a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, you could share your knowledge to other folks. When you read this Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library), you can tells your family, friends as well as soon about yours book. Your knowledge can inspire average, make them reading a book.

Levi Ryan:

Often the book Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library) has a lot associated with on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. Mcdougal makes some research before write this book. This particular book very easy to read you will get the point easily after scanning this book.

Joshua Miner:

That guide can make you to feel relax. This particular book Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library) was colourful and of course has pictures on there. As we know that book Between Certainty and Uncertainty: Statistics and Probability in Five Units with Notes on Historical

Origins and Illustrative Numerical Examples (Intelligent Systems Reference Library) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. So , not at all of book are usually make you bored, any it offers you feel happy, fun and relax. Try to choose the best book in your case and try to like reading in which.
