Opening with an explanation of the complex nature of the policy and its importance in political and economic terms, the book then examines the identities, responsibilities, attitudes, constituents, and institutional cultures of the executive branch, Congress, and interest groups involved in the formulation and conduct of policy. After considering the hardware of policymaking, the volume examines the major theories and decision-making models. It then focuses on the delicate relationship between the administration and Congress, illustrated by three case studies. In conclusion, the work assesses the strengths and weaknesses of the current policymaking process and offers recommendations for improvement.
