## Pathology of Asbestos-Associated Diseases

The third edition of *Pathology of Asbestos-Associated Diseases* builds on the success of the previous editions by fully updating knowledge on diagnostic and epidemiologic aspects and presenting important new insights derived from new epidemiologic studies and animal studies. Background information is first provided on the mineralogy of asbestos, occupational and environmental exposure, and asbestos bodies. The various diseases associated with asbestos exposure are then considered in turn, with detailed description and illustration of pathologic features as well as extensive discussion of etiology, epidemiology, differential diagnosis, treatment, and prognosis. Further chapters are devoted to cytopathology, experimental models of disease, analysis of tissue mineral fiber content, and medicolegal issues. This book will be an essential reference for pathologists and an invaluable source of information for pulmonologists, radiologists, and occupational medical practitioners.
