Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE) Stephen F. Bush

This book bridges the divide between the fields of power systems engineering and computer communication through the new field of power system information theory.

Written by an expert with vast experience in the field, this book explores the smart grid from generation to consumption, both as it is planned today and how it will evolve tomorrow. The book focuses upon what differentiates the smart grid from the "traditional" power grid as it has been known for the last century. Furthermore, the author provides the reader with a fundamental understanding of both power systems and communication networking. It shows the complexity and operational requirements of the evolving power grid, the so-called "smart grid," to the communication networking engineer; and similarly, it shows the complexity and operational requirements for communications to the power systems engineer.

The book is divided into three parts. Part One discusses the basic operation of the electric power grid, covering fundamental knowledge that is assumed in Parts Two and Three. Part Two introduces communications and networking, which are critical enablers for the smart grid. It also considers how communication and networking will evolve as technology develops. This lays the foundation for Part Three, which utilizes communication within the power grid. Part Three draws heavily upon both the embedded intelligence within the power grid and current research, anticipating how and where computational intelligence will be implemented within the smart grid. Each part is divided into chapters and each chapter has a set of questions useful for exercising the readers' understanding of the material in that chapter.

Key Features:

- Bridges the gap between power systems and communications experts
- Addresses the smart grid from generation to consumption, both as it is planned today and how it will likely evolve tomorrow
- Explores the smart grid from the perspective of traditional power systems as well as from communications
- Discusses power systems, communications, and machine learning that all define the smart grid
- It introduces the new field of power system information theory

From reader reviews:

Mark Hart:

Have you spare time for the day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a move, shopping, or went to the particular Mall. How about open or read a book titled Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE)? Maybe it is being best activity for you. You already know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it is opinion or you have various other opinion?

Olga Harrington:

Information is provisions for folks to get better life, information currently can get by anyone on everywhere. The information can be a information or any news even a concern. What people must be consider whenever those information which is inside the former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE) as your daily resource information.

Linda Gabriel:

People live in this new day of lifestyle always try and and must have the extra time or they will get lot of stress from both way of life and work. So , when we ask do people have extra time, we will say absolutely of course. People is human not just a robot. Then we request again, what kind of activity do you have when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, the actual book you have read will be Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE).

Lisa Phelps:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many issue for the book? But any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but additionally novel and Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE) as well as others sources were given know-how for you. After you know how the great a book, you feel want to read more and more. Science e-book was created for teacher or perhaps students especially. Those textbooks are helping them to put their knowledge. In different case, beside science book, any other book likes Smart Grid: Communication-Enabled Intelligence for the Electric Power Grid (Wiley - IEEE) to make your spare time a lot more colorful. Many types of book like this.
