Secure your Dynamics AX 2012 environment with simple and practical steps

Overview

- Get to grips with security concepts for securing your Dynamics AX environment successfully
- Learn to Import users from active directory.
- Master the way to create Claim User.
- Assign users to security roles

In Detail

Securing ERP is the main issue nowadays; it is not only about bits and bytes of network traffic, but also about business transactions, users' privileges and access rights. Hackers raise their awareness to hack and attack ERP systems as the information becomes the vital weapon these days. So securing your ERP is not only about internal control and auditing procedures, but also to protect your entire system against outsiders or unauthorized users. It's the time to secure your ERP system.
